## Fairview

---

Fairview is the third generation family business with wine and cheese production. The farm is located on the southwest-facing slopes of Paarl Mountain, in the heart of the Paarl wine district in South Africa.

Charles Back II started farming with his father in 1978, having completed his oenological training at leading local agricultural institution Elsenburg, and took over full responsibility for the farm upon his father's passing in 1995. This third-generation Back vintner has built further on the Fairview family's tradition of innovative wine growing, an innate understanding of consumer tastes and a keen eye for business opportunities.
